

List of indigenous/low water use species

JUNEE SHIRE COUNCIL (also applicable to Wagga Wagga Council area)

This list has been prepared to indicate plants suitable for the Junee Shire Local Government Area. Junee township also has a salinity problem of rising salt in the groundwater. In those circumstances, specific salt tolerant plants should be utilised such as Bottle Brushes and Melaleucas.

The listing includes a number of indigenous native plants and a warning has to be given about the effect of planting these species (if they are large) near a residence. Some trees that have a large height may be hazardous at their maturity as branches and limbs are prone to fall off without warning in periods of stress.

Certain fruit trees also have the added responsibility of regular seasonal spraying to prevent outbreaks of fruit fly affecting other nearby properties.
